September 2013- June 2015	City and Region Planning- horizontal transition with MYP Erciyes University, Faculty of Architecture, Kayseri

SOME OF THE PROJECTS I HAVE BEEN IN
İlgilisine 2023-2024

I built the entire frontend part of a mobile application from start to finish using React Native. I created the admin panel using Nextjs. You can download the application from Google Play.

Hotel Nerede 2022

As a freelancer, I make all the frontend developments and admin panel of hotelnerede.com using JS, Ajax, html css, bootstrapp technologies.

.REACT Projects 2021

Farber

Digitalwisers website

İŞKUR Course Completion Project: 2020

In the name "Yemek Mi Dedin"; I have developed an interactive site with categories such as breakfast, lunch, dinner, cafes and entertainment venues, where you can access the discounted deals of these places, where you can become a member, with a management panel. In the project: I used MVC structure, .Net language, SQL Server as database. .

.NET - Project I'm Using MVC 2019

In my Graduation Project; I created a platform where nearby Historical and Cultural Places are displayed on a single map, where people can become members, and the opportunity to review the site, which has a wide range of content about historical places.

PHP- Yii Framework-Mvc 2019

I have designed many websites based on Yii Framework MVC through my internship in 2019.

Python Project 2018

In 2018 internship named "PerSent"; Using python, css and html, we made our application on Twitter in a positive, positive or negative way. (Team work)

MongoDB-Express-Angular-NodeJs 2017

Using MEAN technologies, I developed an application called "Mekan Bul", which can find nearby places, where people can write comments, make ratings, and find the distance between them. (JavaScript)
